To,

The Principal  
 All Affiliated (Commerce & Management) Colleges/Institutions,  
 Shivaji University, Kolhapur

**Subject : Regarding Syllabi of MCA Part-I (Sem-I/II) Choice Based Credit System (CBCS) degree programme under the Faculty of Commerce & Management.**

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the University authorities have accepted and granted approval to the revised syllabi of MCA Part-I (Sem-I/II) Choice Based Credit System (CBCS) under the Faculty of Commerce & Management.

This syllabi shall be implemented from the academic year 2020-2021 onwards. A soft copy containing the syllabus is attached herewith and it is also available on university website [www.unishivaji.ac.in](http://www.unishivaji.ac.in) (Student - Online Syllabus).

The question papers on the pre-revised syllabi of above mentioned course will be set for two examination These chances are available for repeater students, if any.

You are therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Yours faithfully,

Dy. Registrar

Encl : As above

Copy to,

1. I/c Dean, Faculty of Commerce & Management
  2. Chairman, Board of Studies
  3. Director, BOEE

# **SHIVAJI UNIVERSITY, KOLHAPUR.**

Estd. 1962

NAAC 'A' Grade

**Faculty of Commerce and Management**

**Syllabus For**

**MCA Part – I (Sem I & II) (CBCS)**

**(To be implemented from June 2020 onwards)**

**(Subject to the modifications that will be made from time to time)**

**Shivaji University, Kolhapur**  
**Master of Computer Applications (M.C.A.)**  
**(Under the Faculty of Commerce and Management)**  
**(Choice Based Credit System)**  
**MCA (Part I) from Academic Year 2020-2021**  
**MCA (Part II) from Academic Year 2021-2022**

**1. Introduction**

Master of Computer Applications (MCA) is a two-year (four semesters) professional Master Degree program in computer applications. The program is designed to meet the growing demand for qualified professionals in the field of Information Technology. It is a postgraduate program that can be taken up after obtaining a Bachelor's Degree. The MCA program is inclined more towards Application Development and thus has more emphasis on the latest programming language and tools to develop better and faster applications. It covers various aspects of computational theory, programming, algorithm design and optimization, network and database management, mobile technologies, cyber security, information system audit, etc.

- Discipline Specific elective courses and General Electives to be offered in functional areas have to depend on student preferences and needs of the user systems in the region in which the educational institution is located.
- The MCA program is a mixture of computer-related and general business courses. The computer related courses include Programming Techniques, Database Managements and Data Analytics techniques. The general business courses include the emerging areas in management like Digital Marketing, Industry 4.0 norms and Entrepreneurship Development including Start-ups.
- The program would emphasize on Experiential Learning which aims at creation of business applications. Inclusion of projects improves student's technical orientation, understanding of IT environment and domain knowledge. It will provide a helpful platform for students to become a successful Software professional. This would improve domain knowledge of various areas, which would help the students to build software applications on it. The students are exposed to software development in the data processing environment with special emphasis on Software Project Management and Software Engineering for small and medium organizations.
- Subjects such as IS Audit, Design Thinking, Digital Forensics, Cyber Security and Big Data Management will work as new application domains. Major focus is given on Data Analytics so that student can choose Data Analyst as their career options. Also, exposure to Web applications, Web 2.0, Web Mining and Web Application Security is also provided. Advanced technology includes Internet of Things, Mobile computing and variety of new technologies. Business communication, personality development and seminar will lead to overall personality development of the student and that will help them in their career development and to sustain in the dynamic environment of Information Technology.
- MOOC courses help students for self-learning of emerging technologies and trends in market with the help of online platform. List of various certifications possible through SWAYAM is published on Shivaji University's Web site. Students should try to do maximum Value Added certifications during their learning phase through MOOCs like SWAYAM platform to make their resume rich.

- The new curricula would focus on Outcome Based Education including Cognitive and Affective skills with the help of Discipline specific skills, Ability Enhancement Skills and Hands on experience.
- The inclusion of projects ensures the Experiential Learning where students can apply their skills at respective levels. It will provide opportunity for students to work on various emerging technologies. It will provide appropriate platform for students to work in IT Industry. It will also improve documentation, Coding and Design standards capabilities in students. Inclusion of project for subject such as Web Technology and Mobile Computing will definitely improve students' innovativeness and creativity.
- The Institutes should organize placement program for the MCA students by interacting with the industries and software consultancy houses in and around the region in which the educational Institution is located. The Institute should also promote entrepreneurship skills through Entrepreneurship Development Cell or Incubation Centre.

## **2. Job Opportunities:**

- After completing MCA, students can start their career as a Software Developer and Web Designer & Developer, after some experience, are promoted as system analysts. Other seek entrepreneurial role in the Information Technology world as independent business owners, software consultants, IT Architecture, Network Engineer. Career opportunities also exist in emerging area as Cyber security. Other areas include Data scientist and Cloud Architect.

## **3. Duration of the Course**

The MCA program will be a **full-time two years** i.e. 4 semesters. Pattern of examination will be Semester System.

## **3. Medium of Instruction**

The medium of Instruction will be English only.

**4. Teachers Qualification:** MCA with First class and Two years' experience prescribed by AICTE and University.

## **5. Admission Procedure**

### **(A) Eligibility:**

Passed BCA/ Bachelor Degree in Computer Science or Engineering or equivalent degree OR

Passed B.Sc./ B.Com./ B.A. with Mathematics at 10+2 Level or at Graduation Level (with additional bridge Courses as per the norms of the concerned University).

Obtained at least 50% marks (45% marks in case of candidates belonging to reserved category) in the qualifying Examination.

### **(B) Reservation of Seats**

As per rules of by the Competent Authority

### **(C) Selection Basis**

The selection would be done as per the guidelines given by the Directorate of Technical Education Maharashtra State and the competent authority time to time.

## **6 PEO, PO and CO Mappings:**

**Program Educational Outcomes:** After completion of this program, the graduates / students would:

|         |  |  |
|---------|--|--|
| PEO I   | Technical Expertise                      | Implement fundamental domain knowledge of core courses for developing effective computing solutions by incorporating creativity and logical reasoning.   |
| PEO II  | Successful Career                        | Deliver professional services with updated technologies in Computer applicationbased career.   |
| PEO III | Interdisciplinary and Life Long Learning | Develop leadership skills and incorporate ethics, team work with effective communication & time management in the profession.<br>Undergo higher studies, certifications and technology research as per market needs. |

**Program Outcomes:** Program outcomes are attributes of the graduates from the program that are indicative of the graduates' ability and competence to work as an IT professional upon graduation. Program Outcomes are statements that describe what students are expected to do now or do by the time of post-graduation. They must relate to knowledge and skills that the students acquire from the program. The achievement of all outcomes indicates that the student is well prepared to achieve the program educational objectives down the road. Master of Computer Applications program has following PO's.

**PO1. Computational Knowledge:** Understand and apply mathematical foundation, computing and domain knowledge for the conceptualization of computing models from defined problems.

**PO2. Problem Analysis:** Ability to identify, critically analyze and formulate complex computing problems using fundamentals of computer science and application domains.

**PO3. Design / Development of Solutions:** Ability to transform complex business scenarios and contemporary issues into problems, investigate, understand and propose integrated solutions using emerging technologies

**PO4. Conduct Investigations of Complex Computing Problems:** Ability to devise and conduct experiments, interpret data and provide well informed conclusions.

**PO5. Modern Tool Usage:** Ability to select modern computing tools, skills and techniques necessary for innovative software solutions

**PO6. Professional Ethics:** Ability to apply and commit professional ethics and cyber regulations in a global economic environment.

**PO7. Life-long Learning:** Recognize the need for and develop the ability to engage in continuous learning as a Computing professional.

**PO8. Project Management and Finance:** Ability to understand, management and computing principles with computing knowledge to manage projects in multidisciplinary environments.

**PO9. Communication Efficacy:** Communicate effectively with the computing community as well as society by being able to comprehend effective documentations and presentations.

**PO10. Societal & Environmental Concern:** Ability to recognize economical, environmental, social, health, legal, ethical issues involved in the use of computer technology and other consequential responsibilities relevant to professional practice.

**PO11. Individual & Team Work:** Ability to work as a member or leader in diverse teams in multidisciplinary environment.

**PO12. Innovation and Entrepreneurship:** Identify opportunities, entrepreneurship vision and use of innovative ideas to create value and wealth for the betterment of the individual and society.

**7. Course Outcome(s):** Every individual course under this program has course outcomes (CO). The course outcomes rationally match with program educational objectives. The mapping of PEO, PO and CO is as illustrated below:

| Program Educational Objectives | Thrust Area                              | Program Outcome            | Course Outcome           |
|--------------------------------|--|----------------------------|--------------------------|
| PEO I                          | Technical Expertise                      | PO1,PO2,PO3,PO4 and PO5    | All Core and Lab courses |
| PEO II                         | Successful Career                        | PO6 ,PO7, PO8 PO9 and PO12 | All AEC courses          |
| PEO III                        | Interdisciplinary and Life Long Learning | PO10,PO11                  | All Electives            |

### **8. Program Specific Outcomes (PSO's)**

**PSO 1.** Ability to pursue careers in IT industry/ consultancy/ research and development, teaching and allied areas related to computer applications.

**PSO 2.** Comprehend, explore and build up computer programs in the areas allied to Algorithms, System Software, Multimedia, Web Design and Big Data Analytics for efficient design of computer-based systems of varying complexity.

## 9. Syllabus Structure:

### MCA Part I Semester I

| Sr. No. | Course Type | Course Code | Course Title   | Theory contact hours per week | Practical hours per week | Credits   | University exam | Internal continuous assessment | Total      |
|---------|-------------|-------------|--|-------------------------------|--------------------------|-----------|-----------------|--------------------------------|------------|
| 1       | Core        | CC101       | Introduction to Programming  | 4                             |                          | 4         | 70              | 30                             | 100        |
| 2       | Core        | CC102       | Computer Architecture & Operating System   | 4                             |                          | 4         | 70              | 30                             | 100        |
| 3       | Core        | CC103       | RDBMS  | 4                             |                          | 4         | 70              | 30                             | 100        |
| 4       | AEC         | AEC 104     | Statistical and Mathematical Foundations   | 4                             |                          | 4         | 70              | 30                             | 100        |
| 5       | AEC         | AEC 105     | Principles of Management and Organizational Behavior                               | 4                             |                          | 4         | 70              | 30                             | 100        |
| 6       | AEC         | AEC 106     | Business Communication   | 2                             |                          | 2         | -               | 50                             | 50         |
| 7       | GE          | GE107       | 1. Strategic IT Management<br>2. Knowledge Management<br>3. Financial Technologies | 4                             |                          | 4         | 70              | 30                             | 100        |
| 8       | Core        | CC108       | Lab Based on CC101   |                               | 2                        | 2         | 50              | -                              | 50         |
| 9       | Core        | CC109       | Lab Based on CC102   |                               | 2                        | 2         |                 | 50                             | 50         |
| 10      | Core        | CC110       | Lab Based on CC103   |                               | 2                        | 2         | 50              | -                              | 50         |
|         |             |             |  | <b>26</b>                     | <b>9</b>                 | <b>32</b> | <b>520</b>      | <b>280</b>                     | <b>800</b> |

### MCA Part I Semester II

### Credit Distribution Chart for MCA Program

| Sr. No | Particulars                    | Credits    | Percentage of Credits |
|--------|--------------------------------|------------|-----------------------|
| 1      | CC- Compulsory Courses         | 88         | 68                    |
| 2      | GE- General Electives          | 8          | 7                     |
| 3      | DSE- Domain Specific Electives | 10         | 8                     |
| 4      | AEC- Ability Enhancement       | 22         | 17                    |
|        | <b>Total</b>                   | <b>128</b> | <b>100</b>            |

### 10. Standard of Passing and Award of Class:

Internal as well as external examination will be held at the end of semester. The candidate must score 40% marks in each head of internal as well as external Examination. The student should not have more than 5 backlogs for 2nd year admission.

There will be numerical marking on each question. At the time of declaration of the result the marks obtained by the candidate is converted into grade point as shown below;

**Grade Point Table**

| <b>Grade Points</b> | <b>Range of Marks obtained out of 100 or any fractions</b> |
|---------------------|--|
| 0                   | 0To5   |
| 1                   | 6To10  |
| 1.5                 | 11To15   |
| 2                   | 16To20   |
| 2.5                 | 21To25   |
| 3                   | 26To30   |
| 3.5                 | 31To35   |
| 4                   | 36To40   |
| 4.5                 | 41To45   |
| 5                   | 46To50   |
| 5.5                 | 51To55   |
| 6                   | 56To60   |
| 6.5                 | 61To65   |
| 7                   | 66To70   |
| 7.5                 | 71To75   |
| 8                   | 76To80   |
| 8.5                 | 81To85   |
| 9                   | 86To90   |
| 9.5                 | 91To95   |
| 10                  | 96To100  |

Grading: Shivaji University has introduced a Seven-point grading system as follows:

| <b>Grades</b> | <b>CGPA Credit Points</b> |
|---------------|---------------------------|
| O             | 8.60To10                  |
| A+            | 7.00To8.59                |
| A             | 6.00To6.99                |
| B+            | 5.50To5.99                |
| B             | 4.50To5.49                |
| C             | 4.00To4.49                |
| D             | 0.00To3.99                |

| <b>Overall Final Grades</b> | <b>Class Grade</b>                       |
|-----------------------------|--|
| 8.60 To 10                  | Higher Distinction Level Extraordinary O |
| 7.00To8.59                  | Distinction Level Excellent A+           |
| 6.00To6.99                  | First Class Very Good A                  |
| 5.50To5.99                  | Higher Second Class Good B+              |
| 4.50To5.49                  | Second Class Satisfactory B              |
| 4.00To4.49                  | PassFairC                                |

### **11. Teaching and Practical Scheme**

1. Each contact session for teaching or practical should be of 60 minutes each.
2. One Practical Batch should be of 30 students.
3. Practical evaluation should be conducted before the commencement of University examination

**a) Nature of Theory Question paper:** Nature of question paper is as follows for University end semester examination

- i) There will be seven (7) questions and out of which three (3) to be attempted from question no 2 to question no 6.
- ii) Question No.1 and question No.7 are compulsory in which question No.1 is of multiple choice questions. There will be 8 multiple choice questions and each carries 1 mark. Question No 6 should be a short note for 20 marks, where 5 sub questions will be given, out of which four questions should be attempted
- iii) Question No.2 to Question No. 6 may consist 2 sub questions and each carries 7 Marks or long answer question for 14 marks

### **b) Nature of Practical Question Paper:**

There will be three questions of 15 Marks each, Out of which student have to attempt any two questions and 10 marks for journal and 10 marks for oral for 2 credit lab course and time duration is two hours.

Practical Examination conducted by the University appointed external examiner panel of two members. The panel members appointed should have more than five years' of experience as full time teacher.

### **13. Internal Marks Distribution**

- 1 Five Marks for Mid Tests
- 2 Ten Marks for presentation or activity based learning or Lab Work or Group exercise( Number of students in Group are not more than six)
- 3 Five Marks for Assignments
- 4 Five Marks for library activity/ designing apps or software or working model/ Field Work/online learning activity etc.

Five Marks for Attendance.(75% to 80%- 02 marks, 81% to 85 %- 03 marks, 86% to 90 %- 04 ,marks 91% to 100% - 5 mark)

### **14. Mini- Project**

The Objective of mini project is, to make aware student with current technology to be used in IT industry. The language/platform of the mini-project to be selected from the subject studied in previous and present semester. The Group size of maximum three students can undertake mini project. Project Viva-Voce Examination will be conducted by the University appointed examiner panel of two members. The panel members appointed should have more than five years' of experience as full time teacher.

### **15. Major Software Development Project:**

For major project student should go for in plant training of 50 days after completion of semester II university examination and project report will be submitted to institute/department before 3<sup>rd</sup>

semester university examination. Project work will be done individually and students should take guidance from assigned guide and prepare a Project Report on "Project Work" in two copies to be submitted to the Director of the Institute/Head of the Department. In plant training certificate from respective organisation is mandatory for project certification by Institute. The project viva voce will be conducted after theory examination of 3<sup>rd</sup> semester by the University appointed examiner panel of two members having doctorate and more than ten years' experience as full time teacher.

**16. Fee Structure:** As per directives of Shikshan Shulka Samiti, Govt. of Maharashtra and competent authority.

**17. Requirements:**

1. Core Faculty: As per guidelines of AICTE New Delhi.
2. Computer Infrastructure: Number of Computers, Number of application software, Number of system software's are as per AICTE New Delhi and competent authority guidelines.
3. Internet Bandwidth: 32 MBPS Lease Line and at least 4Mbps Wi-Fi connectivity at 4 or 5 hotspots shall be made available.
4. Arrangement to view MOOC's of NPTEL/ SWAYAM/IIT online Tutorials etc. shall be made available.
5. Class Room, Seminar halls, Tutorial Rooms and Auditorium: As per AICTE Guidelines
6. Each Class Room shall be equipped with LCD projector, Smart Board, Internet etc. Seminar Hall shall have proper furnishing and equipment such LCD projector, Smart Board, PA system and Executive Chairs. Institutions shall have MOOC's Facility Centre and Innovation Laboratory.
7. Language Laboratory shall have a minimum of 20 Computers with appropriate application software.

**18. Revision of Syllabus:**

As the computer technology experience rapid rate of obsolescence of knowledge, revision of the syllabus should be considered every two years. The Workshops on revised syllabi should be organized at the beginning of every semester.

**19. Bridge Course:**

1. This bridge course is conducted for the Non IT graduates i.e., BA, B.Com, and B.Sc., excluding B.Sc. (Computer) and B.Sc. Entire-(Computer/IT) students admitted to MCA Part I.
2. The bridge course is compulsory for non-computer background students (i.e., BA, B.Com, and B.Sc., excluding B.Sc. (Computer) and B.Sc. Entire-(Computer/IT))
3. It is mandatory to complete the syllabus of the bridge course at the beginning of MCA I Sem I.
4. There will be an internal evaluation for Bridge course of total 100 marks which includes 50 marks (10 Marks for each unit) for Term work (Assignments/Lab Assignments/Case Analysis) and 50 marks for multiple choice question Examination.
5. Multiple choice questions Examination include 50 questions. Each question is for one mark having four options. All questions will be compulsory.
6. There will be no negative marking for wrong answer.
7. The bridge course should be completed by the students as prescribed by university authorities. MCA degree shall not be awarded unless the students successfully complete the Bridge Course.

8. The student has to secure 40% marks separate passing both in Term Work and multiple choice questions Examination in order to pass the bridge course.
9. Examination fee shall be made applicable as per University rules. The respective affiliated college should arrange for the contact sessions (60 contact sessions- 12 contact sessions for each unit) for completing the Bridge Course. However the College/Department shall not charge any fee for conducting the Bridge Course.

| <b>Paper CC102 : Computer Architecture and Operating System</b>   |   |                     |                   |
| <b>(Choice Based Credit System)</b>   |   |                     |                   |
| <b>Course Outcomes</b>  | Students of this course will be able to :<br>1. Understand the architecture and working of hardware components in digital computer<br>2. Compare different memory devices used in digital computer.<br>3. Describe the basic concepts and functions of Operating System.<br>4. Illustrate features and significance of Linux operating system.  |                     |                   |
| Marks:100   | Total Hours of Teaching:60  | University Exam :70 | Internal : 30     |
| <b>Syllabus Contents:</b>   |   |                     |                   |
| <b>Unit 1:</b>  | <b>Introduction to Computer Architecture</b><br>Introduction to Digital Computer, Data Processing Components: Logic Gates, Boolean Circuits, Half Adder, Full Adder, Decoder, Multiplexer. Data Storage Components: SR, D, JK, T Flip Flops, Registers, Memory Hierarchy, Architecture of RAM, ROM, Data Representation: Number Systems- Binary, Octal and Hexadecimal Numbers, Inter-conversion between number systems.<br><b>CPU Organization:</b> CPU Building Blocks, Instruction codes, Registers, Addressing Modes, Instruction sets, Instruction execution and Interrupts. |                     | <b>15Periods</b>  |
| <b>Unit 2:</b>  | <b>Introduction to Operating System</b><br>Definition of Operating System, Operating system structures, Types of Operating systems,<br><b>Memory Management:</b> Concept, Memory Management Techniques, Swapping, Contiguous Memory Allocation, Memory Protection, Memory Allocation, Fragmentation, Segmentation with Paging, Virtual Memory Concept, Demand Paging and Page Replacement.<br><b>Process Management:</b> Process Concept, Process scheduling, CPU Scheduling: Basic Concepts, Scheduling Criteria, Scheduling Algorithms.   |                     | <b>15 Periods</b> |
| <b>Unit 3:</b>  | <b>Inter Process Communication:</b> Critical region, synchronization and semaphore, classic problems of synchronization, Deadlock: Methods for Handling Deadlock, Deadlock Prevention, Deadlock Detection and Deadlock recovery.<br><b>Input-Output Processing:</b> Input/ Output Devices, Input-Output Interface, Modes of Transfer, Direct Memory Access, I/O Processor.  |                     | <b>15 Periods</b> |
| <b>Unit 4:</b>  | <b>Introduction to Linux</b><br>Features of Linux, History and development of Linux, Architecture of Linux, Concept of Kernel and shell, Linux File Structure, Directory and File handling commands in Linux.<br><b>Shell scripting:</b> Working with VI editor and its mode, Shell variables, operators, conditional and looping statements, Shell functions, Shell scripting with C and Python.   |                     | <b>15 Periods</b> |

The challenges of planning strategically for IT today, Establishing an IT strategy, process, scope objectives and expectations. Strategies for managing IT Infrastructure, outsourcing strategies, guideline for outsourcing decisions.  |                     | <b>15 Periods</b> |
| <b>Unit 3:</b>                      | IT Governance: Definition and Purpose of IT Governance, Areas of IT Governance- strategic alignment, Value Delivery, Risk Management, Resource management, Performance measurement. Challenges in IT Governance.  |                     | <b>15 Periods</b> |
| <b>Unit 4:</b>                      | IT Governance Framework: concept, need of IT governance framework, Information criteria, Integrated IT Governance Framework –COBIT, Key governance Roles, Responsibilities and Accountability, IT Governance Decision Rights, Key IT Resources and Functions to be managed.   |                     | <b>15 Periods</b> |
|                                     | <b>Reference Books:</b><br>1. IT Governance, Peter Weill and Jeanne W Ross, Harvard Business School Press<br>2. Strategies for Information Technology Governance, Wim Van Grembergen, Idea Group Publishing<br>3. IT Governance, Martin Frohlich and Kart Glaser, Gabler Publication<br>4. IT Governance, A Practical Guide by Christopher BGillies<br>5. IT Governance: How Top managers manages IT decisions right for superior results--- by Peter Weill, Harvard Business School Press<br>6. Corporate Information strategy and Management by L M Applegate<br>7. Information Technology Management by Raner, Potter and Turban.<br>8. Strategic Technology Management by Betz<br>9. IT strategy and Management by SanjivaDubay<br><b>Suggested Additional Reading:</b><br>Information Technology Management by Yadhav<br><b>Suggested Research Journals:</b><br>1. The Journal of Strategic Information Systems<br>2. International Journal of Strategic Information Technology and Applications(IJSITA) |                     |                   |

| <b>M.C.A. Part-I Semester I</b><br><b>Paper GE107: Elective 2. Knowledge Management</b><br><b>(Choice Based Credit System)</b> |   |                     |                   |
|--|---|---------------------|-------------------|
| <b>Course Outcomes</b>   | <b>Students of this course will be able to :</b><br>1) Understand concept of knowledge management and technology application for knowledge management.<br>2) Use the knowledge management tools.<br>3) Understand knowledge management Applications.<br>4) Design knowledge management strategy for organization.   |                     |                   |
| Marks:100  | Total Hours of Teaching:60  | University Exam :70 | Internal : 30     |
| <b>Syllabus Contents:</b>  |   |                     |                   |
| <b>Unit 1:</b>   | <b>INTRODUCTION</b><br>An Introduction to Knowledge Management - The foundations of knowledge management- including cultural issues- technology applications organizational concepts and processes- management aspects- and decision support systems. The Evolution of Knowledge management: From Information Management to Knowledge Management - Key Challenges Facing the Evolution of Knowledge Management - Ethics for Knowledge Management.   |                     | <b>15 Periods</b> |
| <b>Unit 2:</b>   | <b>CREATING THE CULTURE OF LEARNING AND KNOWLEDGE SHARING</b><br>Organization and Knowledge Management - Building the Learning Organization. Knowledge Markets: Cooperation among Distributed Technical Specialists – Tacit Knowledge and Quality Assurance.  |                     | <b>15 Periods</b> |
| <b>Unit 3:</b>   | <b>KNOWLEDGE MANAGEMENT-THE TOOLS</b><br>Telecommunications and Networks in Knowledge Management - Internet Search Engines and Knowledge Management - Information Technology in Support of Knowledge Management - Knowledge Management and Vocabulary Control - Information Mapping in Information Retrieval - Information Coding in the Internet Environment - Repackaging Information.  |                     | <b>15 Periods</b> |
| <b>Unit 4:</b>   | <b>KNOWLEDGEMANAGEMENT-APPLICATION</b><br>Components of a Knowledge Strategy - Case Studies (From Library to Knowledge Center, Knowledge Management in the Health Sciences, Knowledge Management in Developing Countries).<br><b>FUTURE TRENDS AND CASE STUDIES</b><br>Advanced topics and case studies in knowledge management - Development of a knowledge management map/plan that is integrated with an organization's strategic and business plan - A case study on Corporate Memories for supporting various aspects in the process life - cycles of an organization. |                     | <b>15 Periods</b> |
|  | <b>Reference Books:</b><br>1. Knowledge Management – Sudhir Warier, Vikas Publications.<br>2. Knowledge Management Systems – Stuart Barnes, Thomson Learning.<br>3. **Paper CC109: Lab Based on CC102**  
**(Choice Based Credit System)**

|          |                            |               |
|----------|----------------------------|---------------|
| Marks:50 | Total Hours of Teaching:30 | Internal : 50 |
|----------|----------------------------|---------------|

1. Demonstrate the use of ls command with different arguments.
2. Demonstrate the command to list all files contained in home directory, including hidden files.
3. Demonstrate the command to move file from one directory to another directory.
4. Demonstrate the command to sort the directory listing by file size.
5. Demonstrate the command to print the current working directory.
6. Demonstrate the command to view a file on screen.
7. Write a shell script that takes a command –line argument and reports on whether it is directory, a file, or something else.
8. Write a shell script to check whether given number is Armstrong or not.
9. Write a shell script to display first fifty prime numbers.
10. Write a shell script to perform the following string operations to find the length of a given string.
11. Write a shell script to perform to extract a sub-string from a given string
12. Write a shell script to copy the contents of one file into another

| Marks:50 | Total Hours of Teaching:30 | University Exam :50 |
|----------|----------------------------|---------------------|

This laboratory course should consist of 10 to 12 programming exercises with focus on covering the hands-on aspects covered in theory course. It includes

1. Table Creation, Renaming a Table, Copying another Table, Dropping a Table, Describing Table Definitions, Modifying Tables, Joining Tables, Number and Date Functions
2. SQL Queries: Queries, Sub Queries, and aggregate functions
3. DDL: Experiments using database DDL SQL statements
4. DML: Experiment using database DML SQL statements
5. DCL: Experiment using database DCL SQL statements
6. Index : Experiment using database index creation, Renaming a index, Copying another index, Dropping a index , Views: Create Views, Partition and locks
7. Exception Handling: PL/SQL Procedure for application using exception handling
8. Cursor: PL/SQL Procedure for application using cursors
9. Trigger: PL/SQL Procedure for application using triggers
10. Stored Procedure: PL/SQL Procedure for application using stored procedure
11. Function: PL/SQL Procedure for application using function

**M.C.A. Part-I Semester II**  
**Paper CC201: Web Technology**

Evaluate the performance of various networking models.</li> <li>3. Analyze the performance of network on the basis of different services provided by it.</li> <li>4. Identify security threats to network and tools to control network security.</li> </ol>  |                     |               |
| Marks:100  | Total Hours of Teaching:60   | University Exam :70 | Internal : 30 |
| <b>Syllabus Contents:</b>  |  |                     |               |
| Unit 1:  | <b>Introduction to Networking</b><br>Introduction to Networking and Data communication, Need of Networking, Components of Data communication: sender, receiver, message, transmission media, Network Architecture-Client-Server and Peer to peer, Categories of Networks- LAN, WAN. MAN, Network topologies: Bus, Ring, Star, Mesh, Transmission Media: Guided Media - Twisted-Pair Cable, Coaxial Cable, Fiber-Optic Cable, Unguided Media: Radio Waves, Microwaves, Infrared, and satellite communication, Multiplexing: Frequency-Division Multiplexing, Wavelength-Division Multiplexing, Time-Division Multiplexing, Switching: Circuit switching, Packet Switching, Message Switching. |                     | 15Periods     |
| Unit 2:  | <b>Network Models and Services</b><br>OSI reference model, TCP/IP reference model, Comparison of OSI and TCP/IP reference model, Protocol Standards, Introduction to Application Layer: Domain name system (DNS), Hypertext Transfer Protocol (HTTP), Simple Mail Transfer Protocol (SMTP), Telnet, File Transfer Protocol   |                     | 15 Periods    |

|         |  |            |
|---------|--|------------|
|         | (FTP), Introduction to Introduction to Presentation Layer, Services of Presentation Layer: Data encoding, Data encryption and data compression. Introduction to Session Layer, Services of session layer: Data Flow control, simplex, half-duplex, or full-duplex, Token Management, Synchronization.  |            |
| Unit 3: | <p><b>Network Performance</b></p> <p>Transport layer - Transport Layer Primitives: listen, connect, send, receive, disconnect, Protocols: TCP, UDP, Network layer- IP Protocol and IP addressing, Connection oriented and connectionless services, Routing algorithm: Shortest path, Flooding, distance vector, Congestion control, Data link Layer- Data Link Layer protocols: Stop and Wait protocol, Sliding window protocol, Services of Data Link Layer: Framing, Error detection and correction, Flow control,</p>   | 15 Periods |
| Unit 4: | <p><b>Network Vulnerabilities</b></p> <p>Introduction to Vulnerabilities and Threats, Threats in transit, Protocol flaws, Impersonation, Active/Passive and Passive attacks: Virus, Worm. Malware, Hacking, Cracking, Sniffing, Spoofing, Dos, DDos, Masquerade, Trojan Horse. Ransomware, Logic bombs, Botnets, Keyloggers, Rootkits, Identification of Network vulnerabilities. Network security controls: Authentication, Access Controls, Basic Cryptography terminologies.</p>  | 15 Periods |
|         | <p><b>Reference Books:</b></p> <ol style="list-style-type: none"> <li>1. Andrew S. Tanenbaum: Computer Networks, 4th Edition, PHI.</li> <li>2. Use of stack for checking brackets in mathematical expression.</li> <li>8. Conversion of infix to postfix expression.</li> <li>9. Evaluation of postfix expression.</li> <li>10. Implementation of queue using array.</li> <li>11. Implementation of queue using linked list.</li> <li>12. Implementation of priority queue.</li> <li>13. Implementation of Dqueue.</li> <li>14. Implementation of circular queue.</li> <li>15. Implementation of singly linked list.</li> <li>16. Implementation of singly circularly linked list.</li> <li>17. Implementation of doubly linked list.</li> <li>18. Implementation doubly circularly linked list.</li> <li>19. Solving polynomial arithmetic using linked list.</li> <li>20. Implementation of binary tree and operations.</li> <li>21. Traversal of binary tree.</li> <li>22. Implementation of hash table.</li> <li>23. Implementation of hash collision resolution techniques.</li> </ol> |                            |                     |               |

|  |                            |                     |               |
|--|----------------------------|---------------------|---------------|
| <p><b>M.C.A. part-I Semester II</b><br/> <b>Paper CC209: Mini Project</b><br/> <b>(Choice Based Credit System)</b></p> |                            |                     |               |
| Marks:100  | Total Hours of Teaching:60 | University Exam :70 | Internal : 30 |
| <p>A group of maximum three students prepare a mini project under the guidance</p>                                     |                            |                     |               |

|  |  |
|--|--|
|  | of internal guide. Project report will be evaluated by the internal teacher out of 30 marks and there will be viva-voce examination for 70 marks.(Documentation – 30Marks, Viva-Voce -- 40 Marks.) The student should prepare the project report based on courses studied in Sem I and Sem II. |
|--|--|

## 21. Course Equivalence:

| <b>Semester I</b>  |  |                    |   |
|--------------------|--|--------------------|---|
| <b>Course Code</b> | <b>Old Syllabi Course Title</b>                | <b>Course Code</b> | <b>Revised Syllabi Course Title</b>         |
| MCA11              | Fundamental of Computers                       | CC102              | Computer Architecture & Operating System    |
| MCA12              | Python Programming                             | CC101              | Introduction to Programming                 |
| MCA13              | Discrete Mathematics                           | No                 | Two Additional attempts should be given     |
| MCA14              | Database Management System                     | CC103              | RDBMS                                       |
| MCA15              | <b>Principles of Management and Accounting</b> | -                  | Two Additional attempts should be given     |
| MCA1L1             | LAB -I (Python)                                | CC108              | Lab Based on CC101                          |
| MCA1L2             | LAB -II (Database Management System)           | CC109              | Lab Based on CC102(RDBMS)                   |
| MCA1S              | Seminar  | -                  | Two Additional attempts                     |
| <b>Semester II</b> |  |                    |   |
| MCA21              | Linux Foundation                               | No                 | Two Additional attempts should be given     |
| MCA22              | Data Structures with Python                    | CC202              | Data Structure                              |
| MCA23              | Statistical Computing                          | AEC 104            | Statistical and Mathematical Foundations    |
| MCA24              | Web Designing Technologies                     | CC201              | Web Technology                              |
| MCA25              | Software Engineering                           | CC205              | Software Engineering and Project Management |
| MCA2L1             | LAB- III (Linux and Web lab)                   | CC207              | Lab based on CC201(Web Technology only)     |
| MCA2L2             | LAB - IV (DSP Lab)                             | CC208              | Lab based on CC202                          |
| MCA2MP             | Mini Project                                   | CC209              | Mini Project                                |
